

**Supplemental  
Notice of Allowability**

Application No.

09/557,149

Examiner

Steven P. Sax

Applicant(s)

YOHANAN, STEVEN J.

Art Unit

2174

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--**

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to Amendment 5/17/05, Examiner's Amendment 11/16/05.
2. ☒ The allowed claim(s) is/are 3-16.
3. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some\* c) ☐ None of the:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

\* Certified copies not received: \_\_\_\_\_.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.

**THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.**

4. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
5. ☐ CORRECTED DRAWINGS ( as "replacement sheets") must be submitted.
- (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review ( PTO-948) attached
- 1) ☐ hereto or 2) ☐ to Paper No./Mail Date \_\_\_\_\_.
- (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date \_\_\_\_\_.
- Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

**Attachment(s)**

1. ☐ Notice of References Cited (PTO-892)
2. ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3. ☐ Information Disclosure Statements (PTO-1449 or PTO/SB/08),  
Paper No./Mail Date \_\_\_\_\_
4. ☐ Examiner's Comment Regarding Requirement for Deposit  
of Biological Material
5. ☐ Notice of Informal Patent Application (PTO-152)
6. ☒ Interview Summary (PTO-413),  
Paper No./Mail Date 11/16/05.
7. ☒ Examiner's Amendment/Comment
8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other \_\_\_\_\_

### **Supplemental Reasons For Allowance**

1. The amendment filed 5/17/05 has been entered.
2. An examiner's amendment to the record appears below. This was made to bring the claims that were still determined unallowable by the Decision of the Board of Appeals 3/17/05, as well as the new claims introduced by the amendment 5/17/05, into condition for allowance by incorporating into those claims the explicit feature of determining whether the browser is already open and if so navigating to the site address associated with the icon. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Please amend the claims as follows:  
  
3. (currently amended) A graphical interactive method for permitting a computer system to access a web site, the method comprising the steps of:  
  
displaying a desktop icon on a desktop, said desktop icon associated with an address of the web site;  
  
if a web browser application is not currently executing, launching a web browser application in response to a user of said computer system selecting said desktop icon

Art Unit: 2174

for execution, ~~if said web browser application is not currently executing;~~ and accessing the web site using said web browser application and said address of the web site; or  
if a web browser application is currently executing, in response to a user of said computer system selecting said desktop icon for execution, accessing the web site using said currently executing web browser application and said address of the web site.

4. (previously presented) A graphical interactive method for permitting a computer system to access a web site, said method comprising the steps of:

displaying a desktop icon on a desktop, said desktop icon associated with a file containing information relating to the web site;

accessing the web site using an already executing web browser application and said address for the web, in response to a user of said computer system selecting said desktop icon for execution, wherein said web browser application is separate from said file.

5. (previously presented) A graphical interactive computer system for accessing a desired document located at a network location, comprising:

means for displaying a desktop icon on a desktop, said desktop icon associated with a file containing a network address corresponding to the network location;

means for enabling a user of the computer system to interactively select said desktop icon for execution;

means for launching a web browser application in response to the user selecting said desktop icon for execution, if said web browser application is not currently executing, wherein said application is separate from said file; and

means for retrieving the desired document from the network location using said web browser application and said network address.

6. (previously presented) A graphical interactive method for permitting a first computer system to access a web site, said method comprising the steps of:

receiving a desktop icon associated with a file from a second computer system, said file containing an address corresponding to web site;

displaying the desktop icon on a desktop of the first computer system;

launching a web browser application in response to a user of the first computer system selecting said desktop icon for execution; and

accessing the web site using said web browser application and said address corresponding to the web site.

7. (previously presented) The method of claim 6, wherein said receiving step comprises receiving an e-mail from the second computer system, said e-mail including said desktop icon.

Art Unit: 2174

8. (previously presented) The method of claim 6, wherein said receiving step comprises receiving an internet message from the second computer system, said internet message including said desktop icon.

9. (currently amended) One or more computer-readable media having computer-readable instructions thereon which, when executed by a programmable device, if a web browser application is not currently executing, launch the web browser application in response to a user of the programmable device selecting a desktop icon on a desktop for execution, the desktop icon associated with an address of a web site accessible by the web browser application or, if a web browser application is currently executing, use the currently executing web browser application for accessing the web site in response to a user of the programmable device selecting the desktop icon.

10. (currently amended) A desktop icon for display on a desktop, said desktop icon associated with a web site wherein selection of the desktop icon launches a web browser application, if the web browser application is not currently executing, and causes the web browser application to access the web site or, if a web browser application is currently executing, causes the currently executing web browser application to access the web site.

11. (currently amended) One or more computer-readable media having computer-readable instructions thereon which, when executed by a programmable device in

Art Unit: 2174

response to selection of a desktop icon displayed on a desktop, the desktop icon associated an address of a web site, if a web browser application is not currently executing, launch a web browser application, if the web browser application is not currently executing, the web browser application capable of accessing the web site using the address or, if a web browser application is currently executing and capable of accessing the web site using the address, use the currently executing web browser application for accessing the web site using the address.

12. (currently amended) A graphical interactive system comprising:

means for displaying a desktop icon on a desktop, said desktop icon associated with an address of a web site;

means for launching a web browser application, if said web browser application is not currently executing, in response to a user of said system selecting said desktop icon for execution; and

means for accessing the web site using said web browser application and said address of the web site; and

means for accessing the web site, if a web browser application is currently executing, using the currently executing web browser application and said address of the web site in response to a user of said computer system selecting said desktop icon for execution.

Art Unit: 2174

13. (currently amended) A graphical interactive method for permitting a computer system to access a web site, the method comprising the steps of:

displaying a desktop icon on a desktop, said desktop icon associated with an address of the web site; and

in response to a user of said computer system selecting said desktop icon for execution, deciding if a web browser application is already executing and, if so, accessing the web site using ~~an~~ the already executing web browser application and said address of the web site.

14. (currently amended) One or more computer-readable media having computer-readable instructions thereon which, when executed by a programmable device, decide if a web browser application is already executing and, if so, use ~~the~~an already executing web browser application to access a website in response to a user of the programmable device selecting a desktop icon on a desktop for execution, the desktop icon associated with the address of the web site accessible by the web browser application.

15. (currently amended) A desktop icon for display on a desktop of a computer, said desktop icon associated with a web site, wherein selection of the desktop icon causes the computer to decide if a web browser application is already executing and, if the web browser application is already executing, the selection causing the computer to use ~~an~~ the already executing web browser application and to causes ~~the~~ the web browser application to access the web site.

16. (currently amended) A graphical interactive system comprising:

means for displaying a desktop icon on a desktop, said desktop icon associated with an address of a web site;

means for deciding whether a web browser application is already executing using  
~~an already executing web browser application~~ in response to a user of said system selecting said desktop icon for execution; and

means for accessing the web site using said already executing web browser application and said address of the web site.

4. Authorization for this examiner's amendment was given in a telephone interview with Mr. Brian Pangrle on 11/16/05.

5. The following is an examiner's statement of reasons for allowance: The amendment filed 5/17/05, in combination with the Examiner's Amendment 11/16/05 together place the application into condition for allowance. Claims 3-12 were pending in the application. Per the Decision of the Board of Appeals 3/17/05, claims 4-8 were deemed allowable over the prior art of record, but claims 3 and 9-12 were still determined to be unallowable. In response to this, applicant filed an amendment 5/17/05 attempting to place claims 3 and 9-12 as well as additional new claims 13-16 into condition for allowance. But in view of the interpretation of the 3/17/05 Decision, it

was decided that these claims still lacked sufficient elements such as the web browser being separate than the address file or on a separate computer system (as is recited in allowable claims 4-8), and that these claims at that point did not distinguish over merely selecting an icon to launch a browser that navigates to an internal default site. It was agreed that to put these claims into condition for allowance, that they would be further amended to fully bring out determining if the browser is already executing and if so to then navigate the already executing browser to the site address associated with the selected icon. The Examiner's Amendment fully brings out these features in those claims. These claims now as amended show how multiple instances of a browser application would not be executed, and the claims all distinguish beyond merely launching a browser when an icon is selected that navigates to an internal browser default site address. Independent claims: 3 amended - the method. 4 amended - the method which recites the browser application is separate from the file. 5 amended - the system which recites the browser application is separate from the file. 6 amended - the method where the file is on a separate computer system. 9 amended - computer readable media performing the method as described. 10 amended - system recited from perspective of desktop icon. 11 amended - computer readable media recited from perspective of selecting the desktop icon. 12 amended - system. 13 amended - method that recites "deciding" if the browser is currently executing. 14 amended - computer readable media that recites "deciding" if the browser is currently executing. 15 amended - system recited from perspective of desktop icon that recites "deciding" if

Art Unit: 2174

the browser is currently executing. 16 amended – system that recites “deciding” if the browser is currently executing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven P. Sax whose telephone number is (571) 272-4072. The examiner can normally be reached on Monday thru Friday, 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner’s supervisor, Kristine Kincaid can be reached on (571) 272-4063. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
